

In the Drawings:

Applicant proposes amending the caption of Figure 1 to read --FIG. 1 (Prior Art)-- and amending the caption of Figure 2 to read --FIG. 2 (Prior Art)-- in response to the Examiner's request for a proposed drawing correction or corrected drawings.

In the Abstract:

Please amend the Abstract to read as follows:

ak  
--A user interface device has a graphical user interface that can simultaneously display a combination of television and Internet content in various display modes. The display modes may have different proportions, positioning or other features of the Internet and television content. A viewer of the user interface device may change display modes, such as by selecting a link available in each of the display modes. The television content being displayed may be a broadcast show and the Internet content may be chat from a chat room corresponding to the television show. Various display modes are provided for displaying the television show and corresponding chat, ranging from maximal television display and minimal chat display to minimal television display and maximal chat display. Changing television channels may initiate a corresponding change in the chat room being participated in and the content being displayed.--
